UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D. C. 20555

OCT 10 1978

DOCKET NO. 50-335

Florida Power and Light Company  
ATTN: Mr. Robert E. Uhrig  
Vice President  
P.O. Box 013100  
Miami, Florida 33101

Gentlemen:

This office has received a copy of your September 5, 1978 application for amendment to Facility License DPR-67 which you filed with the Office of Nuclear Reactor Regulation. The application relates to the surveillance requirements for the diesel generator units used as the onsite A.C. power source at St. Lucie Unit No. 1. The application was not accompanied by an amendment fee as prescribed by Section 170.22 of 10 CFR Part 170. In your application you stated that no license amendment fee was required because the request was initiated in response to an NRC staff request and it has only minor safety significance.

The last sentence of Footnote 2 of Section 170.22 exempts Class I, II, or III type amendments which result from a written Commission request provided (1) the requested amendments are to simplify or clarify the license or technical specifications, (2) the amendments have only minor safety significance, and (3) they are being issued for the convenience of the Commission. Although the above application was precipitated by Commission request, has only minor significance, and is pro forma in nature, it is not being considered for the convenience of the Commission nor is it to simplify or clarify the St. Lucie Technical Specifications. On this basis, it is not exempt from fees under the provision of Footnote 2. It is requested, therefore, that you promptly forward a Class II amendment fee of \$1,200 to this office. Fees are payable to the U.S. Nuclear Regulatory Commission by check, draft, or money order. If after the final evaluation of your application is completed it is determined that it was incorrectly classified, you will be notified.

If we can be of assistance to you, please call 301/492-7225.

Sincerely,

*W. O. Miller*

William O. Miller, Chief
