<u>ITEM NO.</u>	<u>ITEM DESCRIPTION</u>	<u>LATEST CRGR STATUS</u>
820047	Briefing concerning the Proposed Regulatory Guide regarding instrument Sensing Lines.	CRGR recommended that NRR and RES reassess whether the Reg. Guide will be required or voluntarily adopted by any plants currently in the licensing process. If such backfits are intended, appropriate cost-benefit analyses should be developed and provided for CRGR review. NRR and RES should recommend to EDO a proposed policy for developing regulatory guides within the framework of the ongoing effort to develop regulatory requirements intended for future CP applicants. This RG should be held pending EDO review and decision on the broader policy matter.

820051	Review of NRR response to questions raised by the Committee at CRGR Meeting #26 concerning the review of NRR recommendations to resolve USI A-43, Containment Emergency Sump Performance.	CRGR noted that the benefits of the proposed generic requirement for licensees to assess ECCS failure by sump blockage appeared to be substantially overstated. The Committee recommended that NRR re-examine the risk reduction benefits and then either revise or reaffirm the proposed generic requirement above.
