Corrections to Common Emergency Plan Revision

Gentlemen:

This letter submits supplemental information to Revision No. 4 of the common Nuclear Emergency Plan for Peach Bottom Atomic Power Station (PBAPS), Units 2 and 3, and Limerick Generating Station (LGS), Units 1 and 2. Revision No. 4 of the common Nuclear Emergency Plan was submitted by letter dated January 20, 1994, within 30 days of the changes in accordance with the requirements of 10CFR50.54(q) and 10CFR50, Appendix E, and in accordance with 10CFR50.4(b)(5). However, the Revision No. 4 package submitted by letter dated January 20, 1994, did not include Exhibits 3-1 through 3-7, 4-1, 5-1, and 5-2. These exhibits were inadvertently omitted from the Revision No. 4 package and therefore, are attached.

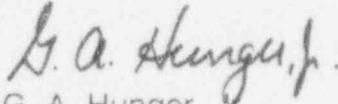

As previously indicated in the January 20, 1994 letter, the changes associated with Revision No. 4 to the common Nuclear Emergency Plan (which included the exhibits) were administrative and were evaluated and determined not to decrease the effectiveness of the PBAPS and LGS common Nuclear Emergency Plan. In addition, the changes had been reviewed by the Plant Operations and Review Committees (PORCs) at PBAPS and LGS.
