3500 North Logan  
Lansing, MI 48909

License No. 21-05199-03  
License No. SUB-1385

Gentlemen:

This refers to the routine safety inspection conducted by Mr. J. L. Lynch of this office on December 9, 1982, of activities authorized by NRC Byproduct Material License No. 21-05199-03 and Source Material License No. SNM-1385 and to the discussion of our findings with you and L. J. Charamella, Ph.D. at the conclusion of the inspection.

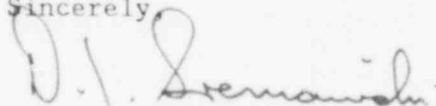

The inspection was an examination of activities conducted under your license as they relate to radiation safety and to compliance with the Commission's rules and regulations and with the conditions of your license. The inspection consisted of a selective examination of procedures and representative records, observations, independent measurements, and interviews with personnel.

During this inspection, certain of your activities appeared to be in non-compliance with NRC requirements, as specified in the enclosed Appendix. A written response is required.

The responses directed by this letter (and the accompanying Notice) are not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, PL 96-511.

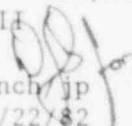

We will gladly discuss any questions you have concerning this inspection.

Sincerely,

D. J. Sreniawski, Chief  
Materials Radiation Protection  
Section 2

cc: L. J. Charamella, Ph.D.  
Radiation Protection Supervisor  
DMB/Document Control Desk (RIDS)
