ATTN: Mr. Sam C. Brown, Jr.
Vice President - Power Station
Engineering and Construction
P.O. Box 26666
Richmond, Virginia 23261

Gentlemen:

This office has received a copy of your September 26, 1978 application for amendment to Construction Permit CPPR-78 which you filed with the Office of Nuclear Reactor Regulation. The application relates to the extension of the completion date for construction of North Anna Unit 2. The application was not accompanied by an amendment fee as prescribed by Section 170.22 of 10 CFR Part 170 (copy enclosed). Requests for amendments such as that identified above should be classified in the same manner as applications for license amendments in Section 170.22. Section 170.12(c) requires that your company provide a proposed determination of the amendment class, state the basis therefor, and submit the fee with your application for the amendment.

We have determined from our preliminary review that the requested action falls into fee Class II (\$1,200) because it is administrative in nature and has no safety or environmental significance. You should forward the amendment fee of \$1,200 promptly to this office. Fees are payable to the U.S. Nuclear Regulatory Commission by check, draft, or money order. If after the final evaluation of your application is completed it is determined that it was incorrectly classified, you will be billed for any additional amount due.

If we can be of assistance to you, call 301/492-7225.

Sincerely,

W. O. Miller

William O. Miller, Chief
License Fee Management Branch
