Subject: Solicitation No. RS-NRR-92-027, "Technical Assistance in Support of NRR Programs and Activities Pertaining to Standardized and Advanced Reactor Design Applications, Other-Than-Power Reactors, and License Renewal Applications"

Dear Sir:

Our cover describes the essence of our proposal. We are offering the NRC a team that is free of questions about conflict of interest issues and that has excellent technical credentials.

The conflict of interest criteria is an easy one for us to meet. Ten years ago we made a corporate decision to support the NRC as a primary business focus and to consciously avoid conflicts of interest or the appearance of conflicts of interest that would undermine that focus.

As to our technical credentials, some of the key points supporting the case for SEA are:

- A solid track record with the NRC, evidenced by our successful completion of more than 40 projects over the past nine years -- projects which have been given high technical marks and were completed within budget
- A reputation for responsiveness to the NRC's needs repeatedly demonstrated by quick reaction to task requests and the completion of contract deliverables on time, often against tough deadlines
- A large, experienced, multi-disciplinary staff that more than satisfies the RFP in all the required technical areas
- And, we have opened an SEA Rockville office, [REDACTED] to enhance communications with the NRC and to further improve our responsiveness.

We have written our proposal to amplify these points and demonstrate our understanding of the issues facing the NRC today. We hope that it makes a compelling case for our selection. If you have any questions, please call me at (505)-884-2300.

Very truly yours,

SCIENCE AND ENGINEERING ASSOCIATES, INC.
