

SAFEGUARDS INFORMATION

December 30, 1982

Florida Power and Light Company
ATTN: Dr. R. E. Uhrig, Vice President
Advanced Systems and Technology
P. O. Box 14000
Juno Beach, FL 33408

Gentlemen:

Subject: Report No. 50-389/82-76

This refers to the special preoperational safeguards inspection conducted by Mr. D. Moore, of this office on December 13-17, 1982, of activities authorized by NRC License No. CPPR-144 at St. Lucie 2 and to the discussions of our findings held with Mr. J. G. West, Plant Security Supervisor, at the conclusion of the inspection.

Areas examined during this inspection included your physical security program as scheduled to be implemented under the provisions of Title 10, Code of Federal Regulations, Part 73, "Physical Protection of Plants and Materials" and the specific requirements of your approved Security Plan. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, performance tests, and observations by the inspectors.

Within the scope of this inspection, no violations or deviations were disclosed. However, three items were identified which will require resolution prior to fuel loading. These items are discussed in the enclosed report.

The material enclosed herewith contains Safeguards Information as defined by 10 CFR 73.21 and its disclosure to unauthorized individuals is prohibited by Section 147 of the Atomic Energy Act of 1954, as amended. Therefore, the material, with the exception of the report cover page which is an inspection summary, will not be placed in the Public Document Room.

Should you have any questions concerning this letter, we will be glad to discuss them with you.

Sincerely,

H. C. Dance, Chief
Project Branch 2
Division of Project and
Resident Programs
