

APPENDIX A

NOTICE OF VIOLATION

United Technologies Corporation
East Hartford, Connecticut 06108

Docket No. 040-00791
License No. SMB-151

During an NRC inspection conducted on January 26, 1994, a violation of NRC requirements was identified. In accordance with the "General Statement of Policy and Procedure for NRC Enforcement Actions," 10 CFR Part 2, Appendix C, the violation is listed below:

Condition 13 of License No. SMB-151 requires that licensed material be possessed and used in accordance with statements, representations and procedures contained in an application dated October 18, 1988.

Item 10.3, "Surveys and Monitoring", of the application dated October 18, 1988 requires that removable contamination surveys be performed periodically.

Contrary to the above, as of January 26, 1994, removable contamination surveys were not performed periodically. Specifically, removable contamination surveys were not performed during 1993 at locations where welding, cutting, shearing and punching of source material took place.

This is a Severity Level IV violation (Supplement VI).

Pursuant to the provisions of 10 CFR 2.201, United Technologies Corporation is hereby required to submit a written statement or explanation to the U.S. Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, D.C. 20555, with a copy to the Regional Administrator, Region I, within 30 days of the date of the letter transmitting this Notice of Violation (Notice). This reply should be clearly marked as a "Reply to a Notice of Violation" and should include for each violation: (1) the reason for the violation, or, if contested, the basis for disputing the violation, (2) the corrective steps that have been taken and the results achieved, (3) the corrective steps that will be taken to avoid further violations, and (4) the date when full compliance will be achieved. If an adequate reply is not received within the time specified in this Notice, an order or a Demand for Information may be issued to show cause why the license should not be modified, suspended, or revoked, or why such other action as may be proper should not be taken. Where good cause is shown, consideration will be given to extending the response time.
