Gentlemen:

We have reviewed your letter dated July 23, 1982 in which you propose to add fans to the MAA outside walls in order to improve plant cooling. It is our opinion that the design features for each fan precludes an individual from physically disassembling the security grid and therefore prohibits unauthorized removal of SSNM from the building. We agree that your proposed modifications do not decrease the effectiveness of your plan and therefore meet the provisions of 10 CFR 70.32(e).

Sincerely,

Original Signed By:
