BP Oil Company
Attn: Joe Matlack
Reliability Superintendent
Post Office Box 428
Marcus Hook, Pennsylvania 19061

Dear Mr. Matlack,

We want to express our appreciation to you and Mr. J. Charles Reany for your cooperation and assistance in facilitating the U.S. Nuclear Regulatory Commission's unannounced safety inspection of its radioactive materials licensee, Canspec Testing. In particular, Mr. Reany's help made it possible to perform the safety inspection with the assurance that the licensee's activities were observed by the inspector in a manner which complied with BP Oil safety requirements. Mr. Reany did not object to staying an hour past his usual quitting time to stay with the NRC inspector until actual radiography work could be observed. The NRC performs these field inspections so that we may evaluate the licensees' conformance with the applicable federal regulations and license conditions of use and to ensure both worker and public health and safety. Your help exemplifies your concern in this regard too.

We look forward to continuing cooperation between your organization and the U.S. Nuclear Regulatory Commission. Again we appreciate your company's commitment to its employees safety as well as its commitment to a safe working environment for all.

Sincerely,

Original Signed By:
Walter J. Pasciak
