AND
SAN DIEGO GAS AND ELECTRIC COMPANYNOTICE OF ISSUANCE OF AMENDMENT TO PROVISIONAL
OPERATING LICENSE

The U. S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 37 to Provisional Operating License No. DPR-13, issued to Southern California Edison Company and San Diego Gas and Electric Company (the licensees), which amended the license and revised its appended Technical Specifications for operation of the San Onofre Nuclear Generating Station, Unit 1 (S0-1) located in San Diego County, California. The amendment is effective as of its date of issuance.

The amendment deletes License Conditions 3.E, 3.F(1) and 3.F(2) which relate to the steam generator inspection requirements and primary to the secondary leakage limit. In addition, the amendment incorporates provisions in the Technical Specifications required for operation of S0-1 with the refueled Cycle 7 core.

The applications for the amendment comply with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR §51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.
