ORGANIZATION (Office, dept., bureau, etc.)

Kerr-McGee

TELEPHONE NO.

SUBJECT

Cushing decontamination/remediation.

Was Holley's 3/24-25 visit to Cushing

SUMMARY

① Still concerned about Holley's statement that airborne monitoring may be necessary up to 10 miles radius around Cushing site. I informed Still that NRC would evaluate Kerr-McGee's proposal for airborne monitoring and that stations up to 10 miles from site probably not necessary.

② discussed, in response to Still's question, new residual contamination release authorized emissions possible effort that NRC would not "reopen" sites remediated under current release criteria after new release complete.

③ I emphasized again that Kerr not back to any residual sites without contacting NRC first.
