Gentlemen:

This refers to the inspection conducted by Messrs. H. M. Wescott, C. M. Erb, P. Barrett, and J. Hughes of this office on January 23-26, 1979, of activities at Wm. H. Zimmer Nuclear Power Plant authorized by NRC Construction Permit No. CPPR-88 and to the discussion of our findings with Messrs. B. Culver, W. Schwiers, J. R. Schott and others at the conclusion of the inspection.

The enclosed copy of our inspection report identifies areas examined during the inspection. Within these areas, the inspection consisted of a selective examination of procedures and representative records, observations, and interviews with personnel.

During this inspection, certain of your activities appeared to be in noncompliance with NRC requirements, as described in the enclosed Appendix A.

This notice is sent to you pursuant to the provisions of Section 2.201 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations. Section 2.201 requires you to submit to this office within twenty days of your receipt of this notice a written statement or explanation in reply, including for each item of noncompliance: (1) corrective action taken and the results achieved; (2) corrective action to be taken to avoid further noncompliance; and (3) the date when full compliance will be achieved. The inspection showed that action had been taken to correct item 4.b of Appendix A and to prevent recurrence. Consequently, no reply to item 4.b is required and we have no further questions regarding this matter at this time.
