RE: A PLEA FOR HELP AND COMPASSION!

SUBJECT: NUCLEAR AUDITOR TERMINATED FOR ADDRESSING SAFETY AND QUALITY DEFICIENCIES; ADMINISTRATIVE CONTROLS (INCLUDING THE SECRETARY OF LABOR - PUTTING ASIDE HIS REQUIRED 30 DAY PERFORMANCE) AND PROCESS HAVE DRAGGED ON FOR OVER 2 YEARS.

DEAR MR. RUSH LIMBAUGH:

Why must the Congressional Laws take so long and be so ineffective? The facts proved that FPC discriminated both in the nuclear whistleblower and in employee discrimination using intentional harassment and interrogation. Now I have asked my Congressional representative (Mrs. Louise Slaughter) for help - over a year ago. The two responses state - even with the Secretary Of Labor required by Congressional Law to act in 30 days from February 1993, the Secretary Of Labor is still TOO busy to comply. Enclosed find my Initial, Reply Brief, AND responses for your use.

Why are laws strictly followed to encumber the Congressional Law followers, while the SOL can put off the critical decision that could free me from the mental and financial stresses? I can not even be a part of my children's lives because of Congresses lack of action. And as I have stated I am being financially and mentally abused. Part of the mental abuse is that I believe the United States of America upholds regulations governing nuclear power plants; when days go by and many people just say the Congressional Laws are just SMOKE SCREENS, I almost loose faith. Can you help? Helping me will help others before others are permanently maimed or die from managerial willful misconduct and graft. Yes die; Florida Power Corporation wilfully approved procedures placing lives in danger - one individual fell to his death.

As we near Easter, look at your family and think of my family torn apart, and please find some help for us. I listen to WHAM 1180 in Rochester as often as I can. I am medically disabled due to the treatments and medications required to relieve the manic-depressions, caused by the pressures - illegal pressures - applied by Florida Power Corporation before the intimidating, threatening and harassing termination process. That has been followed by the Nuclear Regulatory Commission, Inspector General cover-ups, and the Administrative Law Judges putting aside the truth - direct testimony - to favor a discriminatory reason for termination. Yes true, bold discrimination was demonstrated, then the ALJ took the FPC excuse for their actions - discrimination again - and agreed. The ALJ was presiding to determine if the Federal Law provision were met. The ALJ

PDR PR
MISC 58FR7265 PDR

documented all provisions met, but the ALJ put one in the text, not disclosed where in was required to be.

Yes I need help. The Secretary of Labor is one year late on his required 30 day response. The Administrative Law Judge failed to perform his required duty - why - (it is clear why) But why the Nuclear Regulatory Commission and the Inspector General are being influenced is scary. I identified violations, NRC inspections were hidden, the NRC called me a thorn in their side in 1992, my car was vandalized two weeks in a row. Please do what you can. If you need more details, I will be more than glad to provide you the information, or visit with you.

Sincerely

Edward S. Wollesen
