ROBERT E. DENTON
VICE PRESIDENT
NUCLEAR ENERGY
(410) 280-4455

March 4, 1994

U. S. Nuclear Regulatory Commission
Washington, DC 20555

ATTENTION: Document Control Desk

SUBJECT: Calvert Cliffs Nuclear Power Plant
Unit Nos. 1 & 2; Docke: Nos. 50-317 & 50-318
Evaluation of Isolation Provisions for the Service Water System (TAC
Nos. M87189 and M87190)

REFERENCE: (a) Letter from Mr. D. G. McDonald, Jr. (NRC) to Mr. R. E. Denton
(BG&E), dated November 3, 1993, Request for Additional
Information Concerning Evaluation of Isolation Provisions for the
Service Water System

In the referenced letter, the NRC Staff had identified eight points which required clarification for their review of the Service Water System. The areas in question deal with the use of walkdowns as opposed to analytical methods to determine the seismic adequacy of the non-safety-related portion of the Service Water System. We believe that it would be beneficial to have the Staff members involved in the review walkdown the Service Water System with members of our engineering staff. This would provide them with an opportunity to see the portion of the Service Water System in question as well as have a number of their concerns addressed. Therefore, we propose a meeting at the Calvert Cliffs site with the appropriate NRC Staff in lieu of providing written responses at this time. The meeting can be scheduled at your convenience.

Should you have any further questions regarding this matter, we will be pleased to discuss them with you.

Very truly yours,

110030
