DOCKET 50-155 - LICENSE DPR-6 -
BIG ROCK POINT PLANT - NUREG-0737
ITEM II.F.1 ATTACHMENTS 1 AND 2 -
STACK GAS MONITORING SYSTEM

Consumers Power Company's letter dated November 19, 1982 provided notification that the modifications to the Big Rock Point Stack Gas Monitoring System (NUREG-0737 Item II.F.1, Attachments 1 and 2) would be accomplished prior to the end of December, 1982.

This is to confirm the telephone conversation of December 28, 1982 with a member of your staff wherein we notified the NRC that although the system installation was completed, calibration and other equipment problems preclude making the system operational by the end of December, 1982. Based on the estimate of time required to resolve the equipment and calibration problems as well as to complete training and finalize operating procedures it appears that the earliest date by which the system can be declared operational will be April 1, 1983.
