Re: St. Lucie Unit 2  
Docket No. 50-389, 10 CFR 50.55(e), 82-025  
Insulation on Conax Ring Tongue Connectors

Dear Mr. O'Reilly:

On November 10, 1982, Florida Power & Light notified the NRC of a potential 10 CFR 50.55(e) condition involving the insulation on the Conax support ring tongue connectors. FP&L then submitted an interim report requesting a response date of December 28, 1982. Due to the testing program of the ring tongue connectors not being complete, FP&L will not be able to complete our evaluation by December 28, 1982. FP&L anticipates the completion of the testing and our evaluation to support a final response by January 28, 1983.

Very truly yours,

A handwritten signature in cursive script that reads "Robert E. Ohrig".
