Gentlemen:

SUBJECT: NRC INSPECTION REPORT NOS. 50-413/94-02 AND 50-414/94-02

This refers to the inspection conducted by Jonathan H. Bartley of this office on February 7-10, 1994. The inspection included a review of activities authorized for your Catawba facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

The enclosed Inspection Report identifies activities that violated NRC requirements that will not be subject to enforcement action because the licensee's efforts in identifying and/or correcting the violation meet the criteria specified in Section VII.B. of the Enforcement Policy.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be placed in the NRC Public Document Room.

Should you have any questions concerning this letter, please contact us.

Sincerely,

(Original signed by T. A. Peebles)

Thomas A. Peebles, Chief  
Operations Branch  
Division of Reactor Safety
