

JAN 04 1983

Docket No. 50-213

Connecticut Yankee Atomic Power Company  
ATTN: Mr. W. G. Council, Vice President  
Nuclear Engineering & Operations  
Post Office Box 270  
Hartford, Connecticut 06101

Gentlemen:

By letter dated December 21, 1982, the Division of Licensing (DL) staff approved your application dated September 3, 1982. This application requested relief from ASME Code requirements for volumetric and visual inspection of welds and internal surfaces of the Haddam Neck Plant reactor coolant pumps. Although your application stated that a Class III fee (\$4,000) was enclosed, it has not been received by us.

Based on information provided by the DL staff as the result of their final review of your application, it has been determined that a Class III fee (\$4,000) is appropriate for this request since the review involved consideration of a single safety issue. Therefore, you are requested to remit the sum of \$4,000 to this office.

Sincerely,

/s/

Reba M. Diggs  
Facilities Program Coordinator  
License Fee Management Branch  
Office of Administration
