University City, MO 63130

Dear Mrs. Drey:

On November 2, 1982 the Fuel Cycle staff met with representatives of General Electric Company (GE) to discuss what information GE would need to provide in a license amendment application for the new radwaste treatment system. While the purpose of the new system is to recover uranium from liquid wastes and therefore decrease the radioactive content of liquid waste streams, an estimate of the change in the radioactive content of the releases to the environment would be purely speculative at this time.

Sincerely,

Original signed by:
W. T. Crow
