Attention: Ms. Perry C. Norman, Director

SUBJECT: NRC INSPECTION

This refers to the inspection conducted by Kent M. Prendergast of this office on February 1, 1994. The inspection included a review of activities authorized for the use of radioactive materials under your NRC license. At the conclusion of the inspection, the inspection findings were discussed with you and members of your staff.

Areas examined during this inspection are described in the enclosed inspection report. Within these areas the inspection consisted of interviews with personnel and the observation of radiation safety activities in progress.

The inspection confirmed that following the January 17, 1994, Northgate Earthquake appropriate actions were being taken to control radioactive materials.

During the inspection the NRC inspectors also visited the proposed location of your new Nuclear Medicine Department. The facility appeared adequate for your proposed uses.

Should you have any questions regarding this inspection we will be glad to discuss them with you.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be placed in the NRC Public Document Room.

Sincerely,

140162
