MR RICHARD L BANGART DIRECTOR
OFFICE OF STATE PROGRAMS
U S NUCLEAR REGULATORY COMMISSION
WASHINGTON DC 20555

Re: Response to the 1993 Review of Kansas Agreement State Program

Dear Mr. Bangart:

This is to acknowledge the review process begun February 23, 1993 by Mr. Robert Doda of the NRC Region IV Office and continued through contacts between Mr. Doda and the Kansas program staff. The process continued with a letter from Mr. Carlton Kammerer, formerly of your office, and the visit on May 4th by Mr. Vandy Miller also of your office. As indicated at the conclusion of the visits by both Mr. Doda and Mr. Miller, the effort to adopt the six revisions of the Kansas Radiation Protection Regulations has been continued and completed. Copies of the revised regulations are now available to all Kansas licensees and have been sent to your office under separate cover. Revisions to the department's procedure for amending regulations have been put in place and appear to be effective in reducing unnecessary delay.

The remaining issue identified at that time as a small number of overdue inspections has been corrected.

I am looking forward to continued contacts between our programs and further contacts with you and Mr. Surmeier of your office and Mr. Doda of Region IV.

Sincerely,

A handwritten signature in cursive script, appearing to read "Robert C. Harder".

Robert C. Harder
Secretary
