Subject: RADIATION PROTECTION REQUIREMENTS RULE

Alan:

I received a copy of Mr. Heltemes' memo on the above subject late yesterday. However, there was no attached draft memo to Taylor. Could/would you please provide to me. When OC originally concurred on the package, there was no SECY paper transmitting the rule to the Commission. Is that still the case (i.e., the memo to Taylor will suffice)?

I also need to know if any resource concerns were identified/addressed by any of the offices at the 8/13/93 meeting. When OC originally concurred, it was on the RES resources to conduct the rulemaking; my concern now is that the other offices have the necessary resources (if needed) to implement the rulemaking -- especially in light of the additional requirements identified by OE. Who is responsible for the notification?

Please give me a call to discuss. Thank you!
