SUBJECT: Reports for NRC Review of the Industry Steam Generator  
Degradation Specific Management (SGDSM) Initiative

Dear Jack:

The purpose of this letter is to provide copies of specific reports requested by Mr. Ken Karwoski of the NRC staff on September 13, 1993 for use in the NRC review of the industry Steam Generator Degradation Specific Management (SGDSM) initiative.

Enclosed are copies of the reports as indicated below. Please note that the report listed in item 1 below is proprietary.

1. "Steam Generator Tubing, Outside Diameter Stress Corrosion Cracking at Tube Support Plates - Database for Alternate Repair Criteria, Volume 2: 3/4 Inch Diameter Tubing," EPRI Report, NP-7480-L, Volume 2, October 1993.

Fifteen (15) copies of this report are enclosed. This report contains proprietary information. Therefore, a letter requesting the report be withheld from public disclosure and an affidavit describing the basis for withholding this information from the public and signed by EPRI, the owner of the information, is provided in Attachment 1.

2. "Steam Generator Tubing Outside Diameter Stress Corrosion Cracking at Tube Support Plates - Database for Alternate Repair Criteria, Volume 2: 3/4 Inch Diameter Tubing," EPRI Report, NP-7480-L, Volume 2, Non-Proprietary Version, October 1993.

Three (3) copies of this report are enclosed. This report is a non-proprietary version of the report described in item 1 above.

With the transmittal of these reports, we have provided all the reports requested by Mr. Karwoski on September 13, 1993.

Please contact me if you require additional reports for review of the industry SGDSM initiative. We will provide the necessary information as expeditiously as possible.

Sincerely,

  
David A. Steininger  
Technical Advisor  
Steam Generator Project Office
