This refers to the inspection conducted by Mr. G. T. Gibson of this office on October 4-7, 1978, of activities authorized by NRC License No. NPF-2 and Construction Permit No. CPPR 86 for the Farley Nuclear Plant Unit Nos. 1 and 2 facilities, and to the discussion of our findings held with Mr. W. G. Hairston at the conclusion of the inspection.

Areas examined during the inspection and our findings are discussed in the enclosed inspection report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspectors.

Three new unresolved items resulted from this inspection and are discussed in the enclosed report. These items will be examined during subsequent inspections.
