March 1, 1994

Dear Client:

After discussions with several utility customers in the nuclear industry regarding possible confusion related to proposed changes in nomenclature for 3M Fire Protection Products sold to this industry, it has been decided by 3M not to change the product names and numbers as previously suggested. Please be advised that 3M will continue to supply Interam™ E-50 Series Mats, M-20 Series Mats, and all peripheral 3M Fire Protection Products used in the installation process under their original nuclear product designations. (Please see nuclear product list attached.)

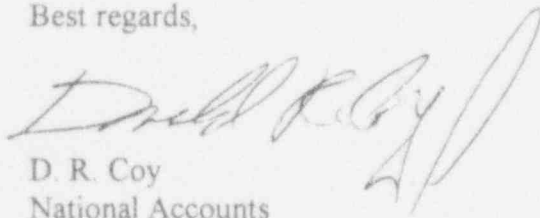

These materials will only be available from 3M Certified Nuclear Installers (list attached), or directly from 3M. These materials are not available through 3M's Authorized L-2 Distributor Network.

The supplied products are controlled through 3M Ceramic Materials Department's rigorous quality program to meet product specifications that can be supplied upon request. The 3M/CMD Quality System is designed around ISO 9001 criteria and not NRC 10 CFR 50 requirements. There is no Appendix B Part 21 procedure in the system.

As always, if after you read this letter you require additional information please contact the undersigned or Richard Licht, 3M Ceramic Materials Department, Technical Manager. Richard's telephone number is 612/733-7079. My telephone number at 3M is 612-736-0341.

Thank you again for your continued support of 3M Fire Protection Products designed for the nuclear industry.

Best regards,

D. R. Coy
