DOCKET NO. 50-368

Arkansas Power & Light Company  
ATTN: Mr. William Cavanaugh III  
Executive Director of Generation  
and Construction  
P.O. Box 551  
Little Rock, Arkansas 72203

Gentlemen:

This office has received a copy of your September 7, 1978 application for amendment to Facility License No. NPF-6 for Arkansas Nuclear One, Unit 2, which you filed with the Office of Nuclear Reactor Regulation. The application requested revision of the Technical Specifications relating to the flow rate for each of the containment recirculation fans. Your application was accompanied by a Class II amendment fee of \$1,200 because you viewed it as being administrative in nature. This request was approved on October 4, 1978, as Amendment 3 to NPF-6.

From our final review of the September 7, 1978 application, we have determined that it involved a safety issue and as such falls in fee Class III. It is requested that you forward an additional \$2,800 promptly to this office. Fees are payable to the U.S. Nuclear Regulatory Commission by check, draft, or money order.

If we can be of assistance to you, call 301/492-7225.

Sincerely,

A handwritten signature in cursive script that reads "Reba M. Diggs".
