Docket No. 50-267

Mr. O. R. Lee, Vice President
 Electric Production
 Public Service Company of Colorado
 P. O. Box 840
 Denver, Colorado 80201

Dear Mr. Lee:

Discussions with members of your staff on December 22, 1982 indicated that you did not receive a copy of Generic Letter No. 82-23 from D. Eisenhut. I have, therefore, enclosed a copy of that letter for your consideration. Since this appears to be a recurring problem, I have also enclosed a listing of the Generic Letters, which have recently been issued, for your review to ensure that you have all other applicable letters.

If you have any questions on this matter or would like a copy any of the letters listed in the enclosure, please contact me.

Sincerely,

Original signed by:

Philip C. Wagner, Project Manager
 Reactor Project Branch #1
 Region IV

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

OCT 30 1982

TO ALL LICENSEES AND APPLICANTS FOR OPERATING POWER REACTORS
AND HOLDERS OF CONSTRUCTION PERMITS FOR POWER REACTORS

Gentlemen:

SUBJECT: INCONSISTENCY BETWEEN REQUIREMENTS OF 10 CFR 73.40(d) AND
STANDARD TECHNICAL SPECIFICATIONS FOR PERFORMING AUDITS OF
SAFEGUARDS CONTINGENCY PLANS (SECURITY PLAN)
(Generic Letter No. 82-23)

Section 73.40(d) of Title 10 of the Code of Federal Regulations requires that each nuclear power reactor licensee provide for an independent review of its safeguards contingency plan at least every 12 months.

It has come to our attention that the Standard Technical Specifications in use by a number of licensees and some existing plant-specific Technical Specifications require that this independent audit be carried out every 24 months.

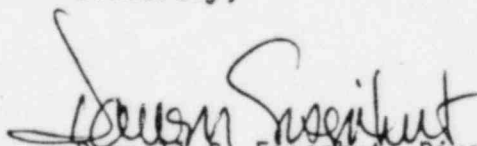

All licensees are required to meet the requirements of 10 CFR 73.40(d), notwithstanding any provision that may have been in their Technical Specifications prior to the issuance of 10 CFR 73.40(d) or that have been added since its issuance.

Accordingly, you are requested to assure that your provisions for carrying out an independent audit of your safeguards contingency plan is in accordance with 10 CFR 73.40(d). If your Technical Specifications contain a provision that is less frequent than the regulations, you should request the staff to modify your technical specifications to conform to the rule.

Because this Technical Specification is clarifying and made at the request of the Commission, you are not required to remit a license fee for the change.

This request has been approved by OMB Clearance Number 3150-0002, which expires May 31, 1983.

Sincerely,

Darrell G. Eisenhut, Director
Division of Licensing
