

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D.C. 20555-0001

70-133

FEB 16 1994

Docket No. 040-00193 (Terminated)  
License No. SNM-183, C-3692, C-3790,  
34-000653-01/02 (Terminated)

Mr. Lou Weinstein  
Squire, Sanders & Dempsey  
4900 Society Center  
127 Public Square  
Cleveland, OH 44114

Dear Mr. Weinstein:

The U.S. Nuclear Regulatory Commission has recently added the Clevite site in Cleveland, OH to our Site Decommissioning Management Plan (SDMP). The SDMP is intended to provide timely resolution of issues pertaining to non-routine decommissioning sites. The NRC initiated the SDMP in 1990 and has subsequently updated it on an annual basis since then. The SDMP addresses generic policy issues and site-specific issues now pertaining to 50 sites that require remediation to meet our requirements for unrestricted release. Sites are listed in the SDMP if they meet any of the following criteria:

1. There are problems with the viability of the responsible organization.
2. There are large amounts of contaminated soil or unused settling ponds or disposal areas that may be difficult to remediate.
3. There is long-term presence of contaminated, unused buildings.
4. The license was previously terminated, and residual contamination is present in excess of unrestricted release limits.
5. There is contamination or potential contamination of the groundwater from onsite wastes.

Because the Clevite license has been previously terminated and there is residual contamination remaining, we are including it in the SDMP. I am enclosing a copy of the most recent SDMP update for your information. Additional copies are available through the Superintendent of Documents or the National Technical Information Service. By listing the site, we hope to focus our resources on addressing the issues needed to bring about timely remediation. With your cooperation we can achieve this goal.

On November 16, 1993, Mr. Johnson discussed with you the need to begin a characterization of the residual contamination at the Clevite site. You have since transmitted to us a characterization workplan for comment, which we subsequently returned to you with our comments on December 27, 1993. A revised characterization workplan is due to us within 60 days of that date.
