RE: LICENSE RENEWAL APPLICATION FOR SMB-920 AND
SMC-1562

Dear Mr. Milstein:

Enclosed you will find six (6) copies of the renewal application for NRC Licenses SMB-920 and SMC-1562.

While we are submitting these applications today, there are areas of the license application that are still undergoing modification and refinement. However, in an effort to continue working closely with the NRC on the licensing issues, we are nonetheless submitting the application.

One aspect of the application that is extremely important to Cabot is the revised digestion process. Cabot is very close to completing the final engineering work and will soon be ready to begin construction on the building and processing modifications. We would be appreciative of an expeditious approval for the construction and operation of the revised process by the NRC as it has impacts on many areas of the license for Boyertown operations.

Should you have any questions, or require additional information, please feel free to contact me at 610-369-8412.

Sincerely,

Anthony T. Campitelli
Manager, Environmental Affairs
