Subject:

General Atomics Application for SNM to Italy

This request for 3940 grams of U including 780 grams of U-235 is based on a present order and near term anticipated future orders.

GA presently has an order for three fuel elements for the Rome TRIGA (ENEA). This order will utilize about 606 grams of U including 120 grams of U-235.

Based on past experience we would expect the future orders to be about and grams of U including and g of U-235 for ENEA and about 808 grams of U including 160 g of U-235 for the University of Pavia

Thanks for grown cosis tence in processing this export lines application.

Bast regards,

cc: Brian Laney - GA
