Docket No. 070-00441(terminated)

Dear Mr. Gipson:

SUBJECT: INSPECTION OF FORMER ATOMIC ENERGY COMMISSION (AEC) LICENSED SITE
NRC REPORT NO. 999-90003/94019(DRSS)

This refers to the special inspection conducted by Mr. D. G. Wiedeman of this office on February 22-24, 1994, of your facilities located at 6100 W. Warren, Detroit, Michigan. Licensed activities were previously authorized by Atomic Energy Commission (AEC) Special Nuclear Material License No. SNM-0423. The results of our preliminary findings were discussed with members of your staff at the conclusion of the inspection on February 24, 1994.

The enclosed copy of our inspection report identifies areas examined during the inspection. The inspection consisted of a selective examination of representative records from the former license file, observations, independent measurements, and interviews with employees of Detroit Edison Company.

Based upon this inspection, we concluded that licensed material covered under AEC Special Nuclear Material License No. SNM-0423 issued to Detroit Edison Company, was properly transferred in 1973 to Power Reactor Development Company, NRC License No. DPR-9. This license was subsequently issued to Detroit Edison Company on January 23, 1976. Consequently we have no further questions regarding this matter.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter and the enclosure to this letter will be placed in the NRC Public Document Room.

We will gladly discuss any questions you have concerning the inspection.

Sincerely,
