Disposal of VDS-1050 (Promethium 147, 25 microcurie)
and VDS-1911 (Tritium, 130 millicurie)

This is in reference to our telephone conversations today, November 17, I am enclosing herewith the material license that was sent to me by Varian at Beverly, Massachusetts. As I understand the National Oceanic and Atmospheric Administration is exempt by licensing requirements and there is no regulation that we have to adhere to for disposal. If this is correct would you please fax that information to me at (301) 713-0806 or 713-0993. I would also appreciate if you would forward a hard copy of your reply to me at the following address.
