Attention: Captain P. Monroe  
Commanding Officer

Gentlemen:

Subject: NRC Inspection

This refers to the routine safety inspection conducted by Mr. D. Skov of this office on December 10, 1982 of activities authorized by NRC License No. SMB-1346 and to the discussion of our findings held by Mr. Skov with Commander W. Tinston and other members of your staff at the conclusion of the inspection.

The inspection was an examination of the activities conducted under your license as they relate to radiation safety and to compliance with the Commission's rules and regulations and the conditions of your license. The inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector.

During this inspection, it was found that certain of your activities appeared to be in noncompliance with NRC requirements. The items and references to the pertinent requirements are listed in Appendix A. These items have been categorized into severity levels as described in the NRC Enforcement Policy (10 CFR Part 2, Appendix C) 47 FR 9987 (March 9, 1982).

The findings from this inspection, as well as the one conducted during October 22-23, 1979 indicate one repetitive item of noncompliance (see Appendix A, Item A).

We are concerned about the repetitive nature of the items of noncompliance observed during our inspections. In addition to the need for corrective action regarding the specific items of noncompliance included in Appendix A, we are concerned about the implementation of your management control system that allowed the repetitive item of noncompliance to recur. Consequently, in your reply you should describe in particular those actions taken or planned to improve the effectiveness of your overall management control system.

Your response to this Notice is to be submitted in accordance with the provisions of 10 CFR 2.201 as stated in Appendix A, Notice of Violation.
