**OSCAR R. LEE**  
VICE PRESIDENT

January 6, 1983  
Fort St. Vrain  
Unit No. 1  
P-83003

Mr. John T. Collins, Regional Administrator  
Region IV  
Nuclear Regulatory Commission  
611 Ryan Plaza Drive  
Suite 1000  
Arlington, Texas 76011

Docket No. 50-267

Subject: Technical Specification Change for  
Temporary Relief from LCO 4.4.1

References: 1) P-83001, Warembourg to Madsen,  
dated 1-3-83.  
2) G-83010, Gagliardo to Lee, dated  
1-4-83.

Dear Mr. Collins:

In accordance with telephone discussions with our staff on January 3, 1983, through January 5, 1983, Public Service Company of Colorado requests a change to specification LCO 4.4.1 of the Fort St. Vrain Technical Specifications.

Attachment 1 is the requested change and is taken verbatim from your telecopied letter (G-83010). Note that the format for incorporating the change into the Technical Specification has been left to your office per your request.

Attachment 2 is the text of the original relief request (P-83001) which we transmitted on January 3, 1983. This attachment is submitted for reference purposes.

The provisions of the Technical Specification change request have been reviewed by the Plant Operations Review Committee with the finding that the change is safety significant because it involves a Technical Specification change, but that the change is not an unreviewed safety question. The change was also reviewed by the Nuclear Facility Safety Committee with affirmative action.

We are transmitting a voucher under separate cover in the amount of \$1,200. Pursuant to 10CFR170, the fee determination is based on the fact that the requested change is primarily administrative in nature. The change does not involve a safety issue that has not previously been analyzed, since we will be operating under the intent of the existing LCO 4.9.2.

Sincerely,

O. R. Lee  
Vice President, Electric Production
