Mike - I think all of us need to be prepared to go through our presentations at the simulation (the question of who is presenting depends on our ultimate agenda - for example, you may be on board to talk briefly about site-specific aspects). I'll send out an e-mail to everyone next week on this. The times are 8:30 to 5:00 and we'll have to make sure that EPA knows the schedule, etc. I'll fax something to Dorman. Let's discuss the video with keystone - I also have a video on the Bert Avenue site that I'd like you to see. Thanks again for paying so much attention to all of this this - its real helpful to me.
