Dear Mr. Beard:

SUBJECT: TECHNICAL SPECIFICATIONS ADMINISTRATIVE CONTROLS (TAC NO. M86080)

By letter dated November 4, 1992, you requested a meeting with appropriate NRC staff to discuss the proper scope of the Administrative Controls section of the Technical Specifications (TS), as part of the then ongoing effort on finalizing the Improved TS (ITS) for Crystal River Unit 3 (CR-3). A meeting was held on March 3, 1993, and discussions and exchanges of correspondence took place subsequently.

The improved technical specifications for CR-3, issued as Amendment No. 149 in December 1993, resolved many of the matters related to your prior requests for changes to the administrative controls. However, there is an ongoing effort to address other changes to the administrative controls on a generic basis. That generic effort will define the scope and implementation guidance for any additional changes to the administrative controls.

We conclude that the effort on TAC No. M86080 should be considered complete. When the ongoing generic effort is complete, you may request a subsequent amendment to incorporate any additional changes to the administrative controls that you consider appropriate and consistent with the generic guidance.

Sincerely,

L. Raghavan, Project Manager
Project Directorate II-2
Division of Reactor Projects - I/II
Office of Nuclear Reactor Regulation
