Subject: TIMES FOR THE SIMULATION WORKSHOP

I have started getting calls from the Regions regarding the schedule for the simulation workshop on the 11th and 12th at the Holiday Inn in Bethesda. Based on the draft agenda we have the actual workshops, I have been telling people that the workshop will probably start at 8:30 to 9:00 and continue until about 5:00 both days. Any corrections or changes to the schedule? Is Don working up the introductory material at the beginning of the workshops on the issues paper?

On another matter, Pam Harris called today asking about the case studies. Apparently, she had not received the fax that I sent to her and Durmon and Savage two weeks ago! I resent her the case studies today. She informed me that EPA has a video of the Radium Chemical Company Superfund cleanup (entitled "Big Apple, Hot Apple"). She is sending me a copy of this tape. This means we will have video coverage of both Pathfinder and Radium Chemical. I already have tapes of two other SDMP sites as examples. I am also attempting to get tapes or photographs of decommissioning efforts at UNC-Montville and Kerr McGee. We may be able to splice this video footage together into a brief overview video tape that could be viewed before, during, or after the workshops as a sideshow of sorts to acquaint the participants with the "pragmatic" aspects of decommissioning.
