MEMORANDUM FOR: H.R. Denton, Director
Office of Nuclear Reactor
Regulation

FROM: John B. Martin, Director
Division of Waste Management

SUBJECT: PRIORITIZATION OF NON-NRR TMI ACTION ITEMS

In response to your memorandum dated December 20, 1982 we have reviewed the draft report on the prioritization of non-NRR TMI action items. We have no comments on the above document.

The only item identified for NMSS action is Item IV.C.1., "Extend Lessons Learned from TMI to Other NRC Programs." This item is correctly indicated as having a resolution identified. In completing the resolution of this item, we are scheduled to have a Branch Technical Position on waste form which incorporates the TMI resin degradation experience in final form on February 15, 1983.

If you have any questions, please contact Mr. Robert Browning or Mr. Timothy Johnson.

Original Signed by
Robert E. Browning
