Teledyne Isotopes, Inc.
50 Van Buren Avenue
Westwood, New Jersey 07675
Attention: Mr. Steven Black, Radiation Safety Officer

Dear Mr. Black:

This letter is followup to our telephone conversation on October 1982 confirming our report of the meeting held among yourself and Brookhaven National Laboratory and Nuclear Regulatory Commission (NRC) on September 30, 1982.

One outcome of the September 30 meeting was a request by NRC that Teledyne furnish us with a list of generators of Class B waste who use Teledyne as a broker. So far as we can ascertain, the information has not been received to date.

We believe the requested information will aid us in our continuing study of the non-fuel cycle waste, and would still appreciate receiving it, if it is convenient for you.

Thank you for your cooperation. If there are questions, please call me at (301) 427-4055.

Sincerely,

Original Signed By

Kenneth C. Jackson, Sr.
Senior Project Manager
Low-Level Waste Licensing Branch
