Subject: UPDATE ON EPR

INFORMATION MESSAGE - NO ACTION REQUESTED

Attached for your information please find (1) a sample letter of
invitation to a potential participant in the rulemaking workshops
for the Enhanced Participatory Rulemaking on Radiological
Criteria for Decommissioning, (2) a copy of the Federal Register
notice announcing the public workshops, and (3) a copy of the
"final" rulemaking issues paper that was sent to the invited
participants. Please note that the issues paper is public (per
the Federal Register notice); if you receive any requests for it
from an interested member of the public, you are free to
distribute a copy in response to the request.

I am still pulling together the case studies that will be sent to
the participants in advance of the first workshop. These are
coming together in a timely manner. I anticipate e-mailing draft
copies of the case studies by the middle of next week, so stay on
the lookout for the cases. Any comments you may have on those
case studies would be appreciated; we want to be sure that the
case studies will be helpful in bringing into focus some of the
abstract issues associated with the rulemaking. Any video or
photos that you may have of these case studies would also be
appreciated -- if time permits, I would like to assemble about an
hour-long video and/or collection of photographs to further aid
participants in understanding the practical aspects of
decommissioning.

We will be meeting with the facilitator (Keystone), Bob Bernero,
and Chip Cameron in about 15 minutes. The objective of the
meeting to acquaint the individuals who will be facilitating the
workshops with the HQ management and staff that will be involved
in the rulemaking. I will provide any highlights from that
meeting in a subsequent message.
