Gentlemen:

Pursuant to Title 10, Code of Federal Regulations, Part 40, Source Material License SUA-1396 is hereby amended by modification of License Condition No. 67 to read as follows:

- 67. The licensee shall maintain a surety to cover all groundwater restoration and all reclamation and decommissioning, including the cost of offsite disposal of radioactive solid process or evaporation pond residues and a decontamination survey. Surety arrangements covering the costs of restoration of Mine Units 1 and 2 and the costs of decontamination, decommissioning and reclamation of above-grade facilities shall be provided by Wyoming DEQ Bonds #146F7117 and #FS113301. The licensee shall not conduct solution mining operations in any mine unit unless a surety to cover the costs of restoring, reclaiming and decommissioning that unit has been incorporated into this license condition.

At least ninety (90) days prior to the replacement of or revision to this surety arrangement or any subsequent surety arrangements, the licensee shall submit a copy of the proposed new surety or revision, and supporting documentation providing a detailed basis for the covered restoration, reclamation, and decommissioning costs, to the NRC Uranium Recovery Field Office for review and approval. Surety arrangements shall be updated at least annually to account for inflation.

All other conditions of this license shall remain the same.

JAN 17 1983

The license condition detailed above was discussed by telephone between your Mr. Catchpole and Ms. Yvonne Young of my staff. There were no objections.

The effect of this amendment is to accept your surety submittal dated September 20, 1982. This amendment letter does not constitute an authorization to mine in Unit No. 2. Mining in Unit No. 2 can only be authorized by amendment of License Condition No. 61.
