NRC TAC No. _____ SAI Task 1-186-03-342-01

Title: Conference Telecon, William Morris, J. Swift, NRC;

Attachment: E. Rumble, B. Johnson, SAI (on June 3, 1982)
SAI requests corroboration of our description of telecon
and conclusions and directions obtained therefrom.

Message: Main purpose of call was to discuss FES update (Section 7 of FES)
relative to Class 9 Accidents. The response to the NRDC 14th Set of
Interrogatories as well as the schedule for the major PRA review were
also discussed.

NRC participants requested Rumble's comment on their proposed
probability number for release (based on core melt) for use in environ-
mental risk calculations. A summary of the telecon is contained on the
attached sheet.

Task File

SAI mentioned the delivery on May 26th of draft submittals for FES review, NRC staff answers to NRDC interrogatories and plan for interactive review of the applicant's PRA effort. SAI would like specific comments on these in the near future since the final version of these submittals constitutes contract deliverables. NRC staff indicated that the applicant would submit its plan for the PRA on June 18 and that a meeting had been set for July 23 to discuss the plan.
