

January 24, 1983

Docket Nos: 50-424
and 50-425

APPLICANT: Georgia Power Company
FACILITY: Vogtle, Units 1 and 2
SUBJECT: SUMMARY OF MEETING HELD WITH SOUTHERN COMPANY
SERVICES, INC. ON JANUARY 4, 1983

On January 4, 1983, a meeting was held in Bethesda, Maryland with representatives of Southern Company Services, Inc. (SCS) and the NRC licensing project manager (LPM) to answer questions concerning submission of the Final Safety Analysis Report (FSAR) and the Environmental Report (ER). Topics also discussed at the meeting include possible intervention of Georgians Against Nuclear Power (GANP) and resolutions of issues addressed in past NRC correspondence to the applicant.

A detailed outline of the meeting follows as Enclosure 1. Enclosure 2 is the attendance list.

ENCLOSURE 1

MEETING DISCUSSION OUTLINE

A. Information provided by LPM

1. The "Structural Audit and Design Report" addresses concerns of the Structural Engineering Branch and should be forwarded to the NRC six weeks prior to the scheduled audit meeting at the plant site.
2. The preservice inspection program should be forwarded to the NRC approximately six months prior to issuance of the draft SER. The inservice inspection program should be submitted approximately six months following operating license (OL) issuance and is usually a licensing condition. Due to the length of the documents, only 3 to 5 copies need to be submitted with the cover letter indicating limited distribution.
3. Technical Specifications need not be submitted with the FSAR. Rather, in the FSAR, a statement committing to compliance with the Technical Specification revision in effect at the time of OL issuance is necessary. Mark-ups of the Tech Specs should be submitted approximately one year before OL issuance.
4. Fifty copies of the Auxiliary Feedwater Reliability Study (referenced in FSAR Section 10.4.9) should be submitted with the FSAR.
5. The two volumes of the FSAR containing core drilling logs only require limited distribution to GSB, HGEB and the LPM. Copies should also be sent to the U.S. Geological Survey.

B. Information to be provided by the LPM to SCS at a later date

1. When and in how many copies the FSAR should be tendered and docketed
2. When and in how many copies the Security Plan should be submitted
3. Whether tendering should include a check for \$1.5 million or whether the applicant should wait to be billed
4. The appropriateness of referencing applicable FSAR sections in the Environmental Report as suggested in the "Draft Supplemental Guidance for Preparation of Environmental Reports in Support of an Operating License Application"
5. Whether or not it is necessary to put each measurement contained in the ER in metric units as well as English units as suggested in the document listed in item 4 above
6. Whether changes in transmission line routing subsequent to a September 1983 ER submission should be addressed in a CP ER supplement or an OL ER supplement

	ment

DATE ▶

7. The correct format of Chapter 1 of the ER
 8. The date of the next Standard Technical Specification revision
 9. The anticipated date of issuance of Revisions 3 and 4 of the Radiological Effluent Technical Specifications
- C. Information to be provided by SCS to LPM at a later date
1. Clarifying information on the Model F Steam Generator Tube Plugging Criteria document from Westinghouse
 2. Clarifying information on the Precautionary Limitation Setpoint report
 3. Affirmations as to resolutions of issues addressed in past NRC correspondence to the applicant
 4. Dates of construction milestones including steam generator, and dome installations
