Mr. Harold Denton, Director
Office of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
7920 Norfolk Avenue
Bethesda, Maryland 20114

Subject: Independent Design Review for the Shoreham Nuclear Power
Station

Dear Mr. Denton:

TES has completed our preliminary review which has resulted in the issuance of 16 Findings. As noted in TES letter 5633-20 dated November 2, 1982, these Findings should be considered Preliminary until a response is received from LILCO and review of those responses is conducted by TES.

To date TES has 11 responses from LILCO and these are being reviewed. The review of responses to Findings is being carried out as follows:

1. The initiator of the original RRF reviews the LILCO response and submits the results of that review on a RRF-ICR form.
2. The Project Manager and the Chairman of the Internal Review Committee meet with the reviewer, and any other members of the IDR Project Team they feel are required, to discuss the results of the review of LILCO responses.
3. The Project Manager and the Chairman of the Internal Review Committee must reach agreement on the final classification of each item. The reasons for their conclusions will be set forth in writing, signed and attached to the original ICR.

In the process of reviewing LILCO responses, telephone conversations and/or meetings between TES, LILCO and Stone and Webster will be necessary. Records of these conversations and meetings will be made by TES and transmitted to LILCO and the NRC.
