of Virginia**

December 17, 1982

Mr. John A. Olshinski
Director
Division of Engineering &
Technical Programs
Nuclear Regulatory Commission
Region II
Atlanta, Georgia 30303

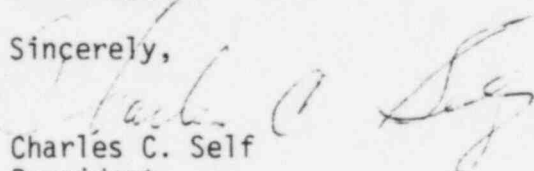

Dear Mr. Olshinski:

This letter is in response to our Notice of Violation dated October 12, 1982, specifically Violation B.

In rechecking with our technologist, I did in fact find that he had not worn his finger badge on the dates, August 26 and September 16, 1982.

Corrective steps have been taken since that time. The tech is aware of the necessity of wearing ring badges during elution of generator and preparation, assay and injection under the supervision of a physician at St. Mary's Hospital and observance of injection by the physician at Lonesome Pine Hospital and Lee County Community Hospital. Since the September 16, 1982 inspection, he has worn his badges at all proper times and will continue to do so. This violation will not occur again.

Sincerely,

Charles C. Self
President
