

25 July 1952

Tunizio Palladio, Chairman  
Nuclear Regulatory Commission  
1717 "H" St. N.W.  
Washington, D.C. 20555

Dear Chairman Palladio

I am writing you today to thank you for your willingness to actually "look and see" what is needed for each plant to operate safely. I have often felt the NRC was a rubber stamp for whatever was convenient for big business. So thank you for representing all of us.

What is happening to <sup>The</sup> Humbolt Nuclear Plant? I understand there is waste stored inside. What is to be done with the waste and what plan has PC+E come up with for closing the grounds and have they been approved?

Thank You - Mrs Lee Bass
