Mr. William T. Russell, Director
Office of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, DC 20555

Attn: Document Control Desk

Subject: LaSalle County Nuclear Power Station Units 1 and 2
Technical Specification Amendment to Facility Operating
Licenses NPF-11 and NPF-18
NRC Docket Nos. 50-373 and 50-374

References:

1. Letter from W. E. Morgan (CECo) to T. E. Murley (NRC),
dated April 16, 1990.
2. Letter from G. J. Diederich (Station Manager LaSalle County
Station) to Director of Nuclear Reactor Regulation, USNRC,
dated June 25, 1989; transmitting License Event Report
#89-019-00, Docket 050-373.

Dear Mr. Russell:

In the Reference 1 letter, Commonwealth Edison (CECo) requested the NRC to grant an amendment to Facility Operating License Nos. NPF-11 and NPF-18, Appendix A, Technical Specifications. The proposed change was submitted to clarify the testing requirements for the Charcoal Adsorber Beds and HEPA Filters of the Standby Gas Treatment (VG) and the Control Room (VC) Emergency Filtration System and Supply Filter Unit. Submittal of this amendment request fulfilled a commitment made in the Reference 2 letter.

March 17, 1994

The purpose of this letter is to inform you that a new amendment request for LaSalle Units 1 and 2 will be submitted in September of 1994. When the new amendment request is submitted, the amendment request proposed in Reference 1 will be withdrawn. The new amendment request is being submitted so that LaSalle's filter testing program will be in accordance with the Improved Standard Technical Specifications (NUREG-1434). The Improved Standard Technical Specifications require that a filter testing program that is independent of the Technical Specifications be incorporated. The filter testing program will include clarified testing requirements and acceptance criteria as committed to in the Reference 2 letter.

Please direct any questions you may have regarding this matter to this office.

Sincerely,

Gary G. Benes
Nuclear Licensing Administrator
