Mr. Carlton Kammerer
Director
Office of Congressional Affairs
Nuclear Regulatory Commission
1717 H Street, N.W.
Washington, D.C. 20555

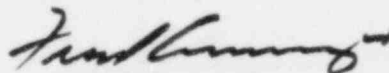

Dear Mr. Kammerer:

Please find enclosed an excerpt of a letter from my constituent, Mr. Michael Lavinio, in which he expresses his support for "getting the N.R.C. to approve the various licensing" for Commonwealth Edison Company to have "its 6 new reactors on the system" in Northern Illinois.

I would be most appreciative if you would give Mr. Lavinio's views your most thorough consideration, and also let me know on his behalf the status of action taken by the Nuclear Regulatory Commission in this regard and when a final decision can be expected.

Thank you for your cooperation and assistance in this matter.

Sincerely,

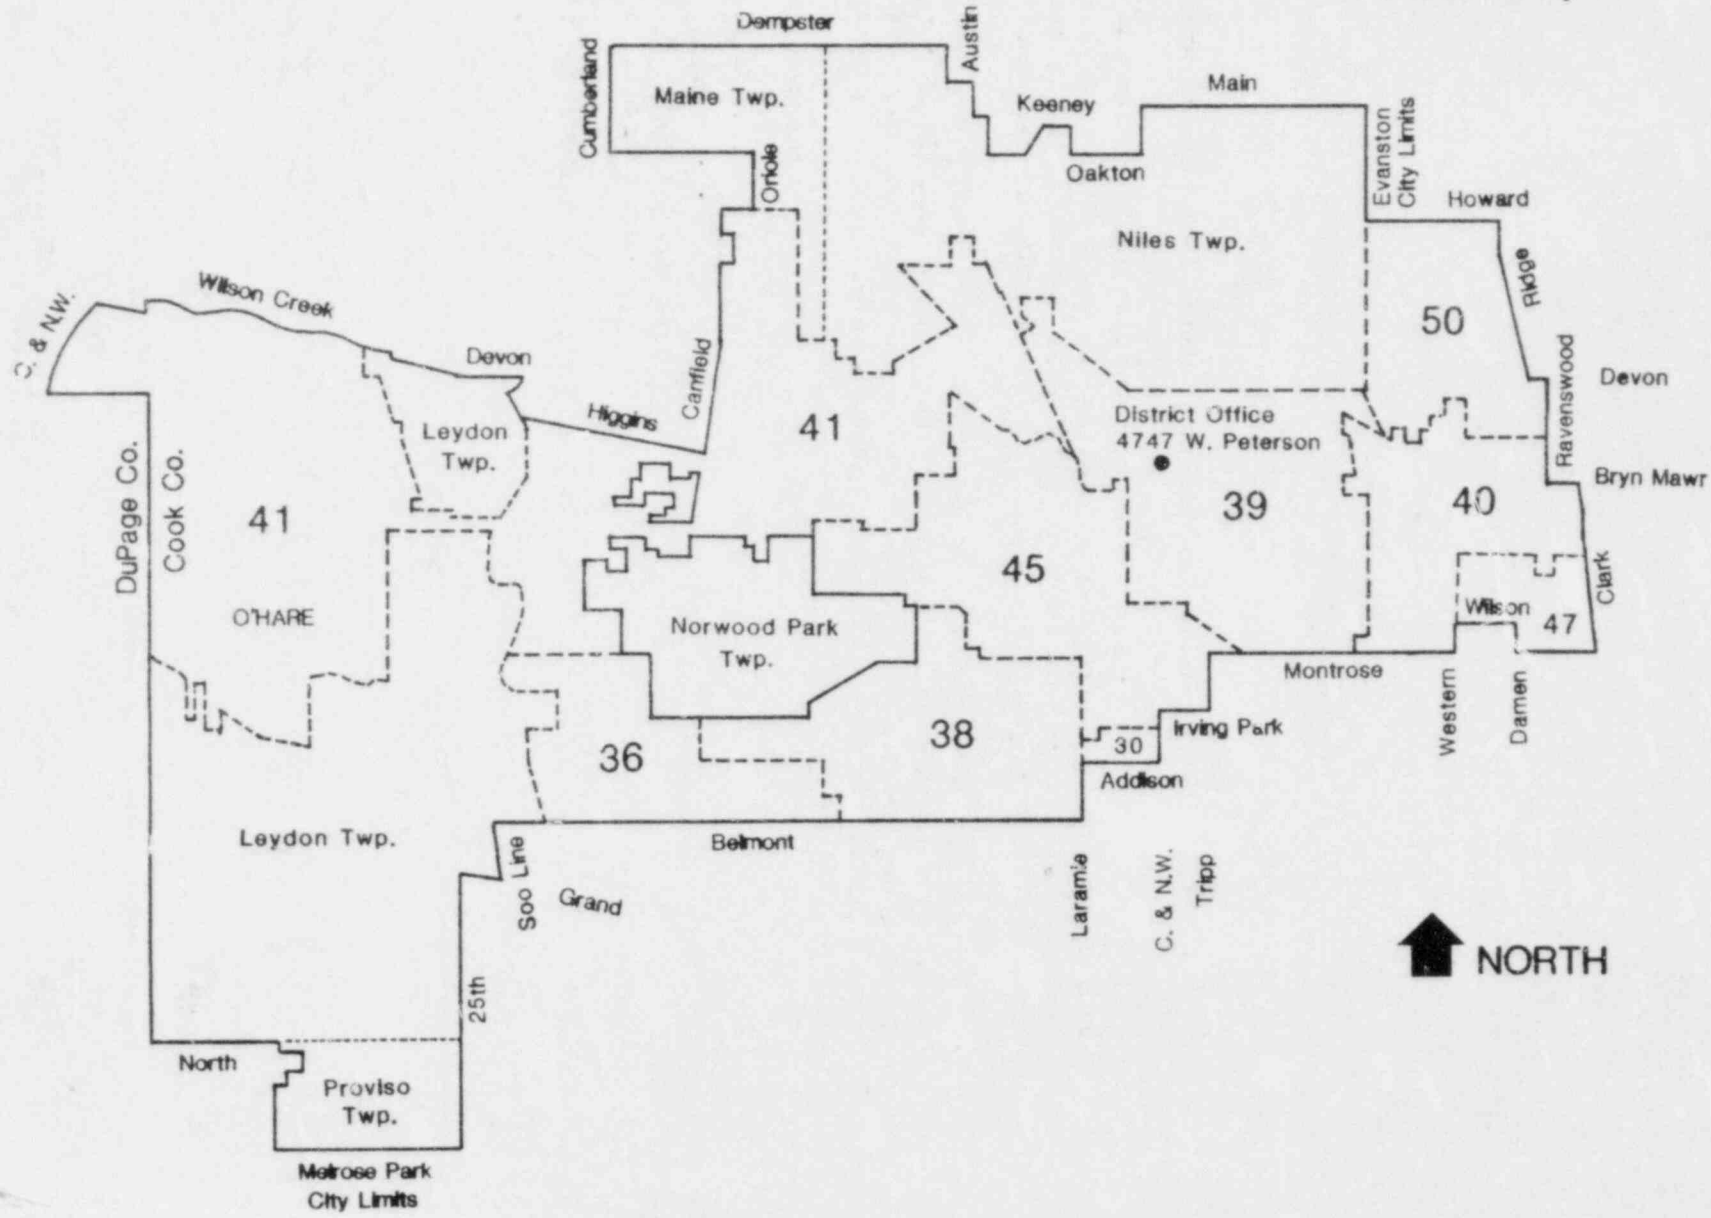

FRANK ANNUNZIO
Member of Congress

the Hon. Frank Annunzio
Member of the 97th U.S. Congress
Dear Mr. Annunzio,

JUL 27 1982

July 24, 1982

Now I see that Commonwealth Edison Co. La Salle Nuclear Power Plant is being hounded by the environmentalist, not because the Plant is not strong enough, but because there are the same type that are against just about everything. So please do all you can for getting the N.R.C. to approve the various licensing. I believe that once Commonwealth Edison Co. gets its 6 new reactors on the system - Northern Illinois will have the World's best and most reliable electric power. So this should keep most manufacturers, a second thought, to leave for the sun belt. The little pause, because of the environmentalist on La Salle Reactor, so far has cost Edison Co. some 10 million dollars. Guess who will finally pay this? The consumer of course.

Best wishes Michael Lavinio
