Docket Nos.: 50-352/353

MEMORANDUM FOR: The Atomic Safety and Licensing Board for:
 Limerick Generating Station, Units 1 and 2

FROM: Thomas M. Novak, Assistant Director
 for Licensing
 Division of Licensing

SUBJECT: BOARD NOTIFICATION - DRAFT OF "A REVIEW OF THE LIMERICK
 GENERATING STATION PROBABILISTIC RISK ASSESSMENT"
 (Board Notification No. 82-108)

In accordance with present NRC procedures regarding Board Notifications, the attached information is being provided to you as constituting new information relevant and material to the Limerick PRA review.

Attachment 1 is a draft of the NUREG/CR entitled, "A Review of the Limerick Generating Station Probabilistic Risk Assessment," prepared by Brookhaven National Laboratory (BNL) acting as a consultant to the NRC staff. This draft document summarizes BNL's review to date of the Limerick PRA. The "Affidavit of Albert Schwencer and Ashok C. Thadani Regarding Schedule for Staff Review of PRA," submitted to the Board on February 1, 1982 (see Attachment 2, page 3), projected a September 30, 1982 availability of this document, the first milestone in the PRA review.

The staff does not yet endorse this report which is still in the draft stage. We expect to review it within the staff and hold meetings with the applicant during the month of November and provide feedback comments to BNL by the end of November. A final draft from BNL, incorporating our comments, is expected to be available in early January. We will inform the Board of the staff's evaluation and endorsement for issuance as a final NUREG document. This is expected to be in late January 1983, with publication in February 1983. For reasons delineated in a memorandum from Albert Schwencer and Ashok Thadani to Darrell Eisenhut and Stephen Hanauer, dated October 8, 1982 (see Attachment 3), the final version of this document, originally projected for issuance on November 30, 1982 will be delayed until February 18, 1983.

Thomas M. Novak
Assistant Director for Licensing
Division of Licensing
